However, CD2 expression on human T cells. Monoclonal antibodies (mAbs) to the human T cell activation antigen, CD2, can block T cell activation in vitro. They have also been used in in vivo human clinical trials to prevent graft-vs-host disease and alloreactive T cell responses. However, the basis of such immunity has not been well understood. We have studied the expression of CD2 on human T cells, using cell surface flow cytometry and immunofluorescence microscopy, and have found that freshly isolated and activated T cells do not express CD2 in a high percentage of cases. CD2 expression is up-regulated upon thymic and peripheral T cell activation, and on the clones of CD4+ T cells, activated with PHA or anti-CD3 antibodies. The majority of CD4+CD8+ thymic T cells and peripheral T cells were found to be negative for CD2. On human T cells, all of the tested anti-CD2 mAbs blocked the mitogenic responses of clones of activated human T cells. However, the mAbs do not interfere with the activities of non-activated T cells or clones of activated T cells, which can be used as an activation marker to study the function of activated T cells. His heart fluttered in a swift beat. I am coming for you. And when I do, I won't go back. "Ugh," Gemma muttered. "Was that enough to appease your superego? You look like you're planning on eating me alive." "I will if you try to leave." Her eyes narrowed. "I'm not leaving until I know you can control your need to feed." A tiny laugh. "I do try. Not well." "Fine. Sit down. So how does this work?" "I pretend to feed, and if you stay, I will keep feeding." She folded her arms across her chest. "Do you honestly think that I'm an idiot? I may have been turned, but I don't know anything about your type of hunger. Or how to fight it." He smiled, even though she didn't deserve it. "You have a choice. Stay and live." "Or?" "You can return to the cave and be left to die." "Which is it?" "Think carefully." "No." She stood and faced him. "You're not going anywhere," he said in a lazy voice. "You came back for me. Now you're going to stay." Gemma's gaze narrowed in fury. His smile turned cynical. "Do you think that you're leaving this place? You think you're free to go? You're in the cave. You always will be. You can't leave until you die. But if you do decide to go, let me tell you—I will kill you." She stared at him, unblinking. "You have 4be0debe42
